

An abstract graphic design featuring a central dark blue circle with the text "mood 4food" in white. Surrounding this circle are various food and dining-related elements: a red watermelon slice with teal seeds, a teal leaf with yellow veins, a yellow leaf, a red semi-circle, and a dark blue fork and spoon. The background is a light beige color with several small dark blue circles. The overall style is modern and colorful.

Mood4Food

After its start in 2009 Mood4Food has developed into a serious player & creative caterer in the professional event market. It all started as 'love for delicious food and drinks' and today Mood4Food presents its services at various events as a complete range of catering products and stands out by thinking 'out of the box' and not being stuck in a fixed pattern.

Besides doing the professional catering at a wide variety of events, sustainability, flexibility, professionalism & creativity with a personal touch are the main concern at Mood4Food.

Mood4Food focuses particularly on congress- & event catering, lunches, receptions, sit-down dinners & walking dinners, but also develops food- and event concepts in any possible theme.

We are 'real people' who understand great food & drinks. We have years of experience in the field of catering and events and always work hard to dot all the I's.

you for a tasting!**

Sustainable catering

It may be clear that catering is an important part of every event. It is therefore essential that it gets a lot of love and attention. And we, at Mood4Food, are very strong in this field. For each event we think of a suitable and sustainable interpretation. As a member of MVO Nederland (CSR the Netherlands), our objectives are well-balanced & ecologically inspired. Mood4Food ensures delicious 'tailor-made' catering!

Event catering

Adapted to the event, the type of visitors, the venue and the number of guests, we create high-profile food concepts for our clients. From simple to chic and from trendy to playful, we customize food & drinks and the overall appearance of the event. Whether it's an extensive and exclusive lunch or a special dinner including the right wine pairing, we like to think along how catering and event may complement and reinforce each other.

The background features a dark blue-grey color palette with stylized, flat illustrations of various food items. These include several red tomatoes on green stems, a bunch of green leafy vegetables, a single green pea in its pod, and a cross-section of a watermelon showing red flesh and black seeds. The food items are scattered across the frame, creating a textured, organic feel.

Good Food
=
Good Mood

Congres catering

As a result of the many fine congresses that we supplied with our catering, Mood4Food has become what it is right now: a straightforward all-round caterer with a lot of fans. We approach congress catering 'our way'. Good coffee, addictive sweets, healthy snacks, delicious rolls, high-quality drinks and bites and perhaps a wonderful dinner to round off. Our super-team will polish up the details so the client does not have to worry about it.

Total organization

In 2009 Mood4Food evolved from event bureau Trend Forward Events, and therefore has a lot of experience in the field of event organization, decoration, technique, etcetera. For our clients it is a big load off their minds to hand over these operations without losing sight. We will be working adequately towards a well-organized event.
